

## Historium Entrance - All-in Ticket

Visit the Historium attraction, see our Virtual Reality Experience and enjoy the panoramic view onto the Market Square with a drink from the Duvelorium Grand Beer Cafe terrace.

Historium, a historical experience attraction, takes you back in time to medieval Bruges. This major tourist attraction is a Two-hour total experience where decors, film, music and special effects merge into a magical experience that excites your senses. You will be escorted in your own language using audio guides through the themed rooms. You will be virtually standing in the middle of historical scenes such as the old port or master painter Van Eyck's studio. Even though Historium was the first in Belgium to introduce such an experience, VR is trending today. Historium aims to offer a true and realistic experience. To do so, special 4D effects have been added so that you can fully experience 15th century Bruges. The experience goes one step beyond what you can see at home on your smartphone using VR glasses. Step into the past and smell, feel, and experience what it was like to live back then. The story that you experience in Historium takes you back to the 15th century, or 1435 to be precise. You will witness the day when Jacob met the love of his life... The young Jacob works for Jan Van Eyck, the famous painter, and in the early morning has to pick up model Anna and parakeet Frederico from the Bruges quays. But not everything goes as planned... You will also be able to enjoy the music by Nicholas Lens specially written for Historium and performed by the Brussels Philharmonic and the Flemish Radio Choir. At the end of your visit, exchange your voucher at the Grand Beer Cafe and taste 1 local beer of your choice.
