

## Helicopter Grand tour

Seize the moment and take the unique opportunity to see the 'Venice of the North' and its archipelago from a helicopter. Flying above the many islands that comprise Stockholm and its surroundings is a unique experience.

The tour takes off from the Old Town, flying low so that you get to see all the important landmarks, such as the Royal Palace and the City Hall. The helicopter flies over the whole city and then moves over to the archipelago and around Vaxholm fortress before heading back into town. The pilot will guide you along the tour, and you'll also get a map with the flight route and landmarks highlighted.
